Curriculum Vitae

Name: Dr.-Ing. Falko Guderian
Phone, E-Mail: +49 177 6935186, falko.guderian@gmx.de
Roles: Senior Engineering Manager, Project / Team Lead (#15/#5)
Special Role: GenAI Tech Lead
Key Areas: Realization of AI and data-oriented platforms, systems, and applications. Team lead engineering and solution design

Outline

1. Motivation - Achievements, Interests, Future Goals
2. Education / Profession
3. Computer Science Skills - Further Training / Certifications
4. Professional Practice (Selected Projects) - Cloud/Platform, AI/ Data Science
5. Languages
6. AIRE - AI Driven Requirements Engineering
7. Long CV

Motivation [top]

Achievements [top]

1. Proven leadership: Successfully managed AI projects with up to 15 team members, delivering on project goals and exceeding revenue expectations by generating >2M € yearly.
2. Expertise in Generative AI: Deep understanding of Generative AI with experience in designing and implementing multiple AI projects.
3. Exceptional project management: Solid track record in executing large scale projects while adhering to budget and timelines.
4. Stakeholder management: Proficient in managing and communicating with various internal and external stakeholders.
5. Financial savvy: Managed projects with multi-million euro budgets, consistently delivering excellent returns on investment.

Interests [top]

1. Innovative technologies: Interested in implementing and advancing disruptive technologies to foster operational efficiency.
2. Collaborative leadership: Enjoy working with diverse teams, cultivating talents, and supporting career growth for team members.
3. Data-driven decision making: High interest in leveraging data and analytics to drive strategic decisions and project success.
4. Continuous learning: Always pursuing new industry knowledge and seeking opportunities to stay at the forefront of the AI field.

Future Goals [top]

1. Leadership expansion: Seeking for higher leadership roles, possibly Director level, committed to driving company strategy and growth.
2. Greater impact: Looking forward to working on projects with bigger scope and impact, enhancing my contribution to the AI industry.
3. Culture fit: Looking for a company that truly recognizes and appreciates individual contributions, and promotes an inclusive and supportive work environment.
4. Enhancing AI application: Interested in exploring new ways of applying AI for solving complex business problems and contribute to technological advancement.
5. Professional development: Aspiring for continuous career growth, expanding my leadership skills further, while staying abreast with latest trends in AI.

Education/ Profession [top]

Organization	Duration	Position
Capgemini Invent	Since Sep 21	Team Lead, Project Lead, and Engineering Manager
Deloitte	Feb 18 – Aug 21	Solution Manager & Architect for Analytics, Cloud, and Machine Learning
T-Systems	Nov 14 – Jan 18	Expert Solutions Engineer for Data Analytics, Machine Learning, and Quality Management
Rohde & Schwarz	Feb 13 – May 14	Project Manager for Hardware/Software Development
Technical University of Dresden	Nov 08 – Jan 13	Doctoral Studies in Electrical and Information Systems Engineering

Computer Science Skills [top]

Area	Skills
Technologies / Operating Systems	Virtualisierung, Cloud, Container, SDN, SDS, NFV, Service Mesh, Windows, Linux
Methods	TOGAF, ITIL, PMP, ISTQB, BSI IT-Grundschutz, HLA, OOA, OOD, OOP, UML, SCRUM, Kanban
Programming Languages	Python, Java, C/C#/C++, Matlab, Verilog, Ansible
GenAI Models / Tools	OpenAI, Aleph Alpha, Llama / Chainforge, LlamaIndex, Langchain
Products and Standards	Jira, Public & Private Clouds, Docker, ElasticSearch, Hadoop, Kafka, Mulesoft, Informatica, Streamlit

Further Training/ Certifications [top]

Date	Certification
Mar 23	NATO Architecture Framework, Version 4
Dec 22	SAFe Product Owner/Product Manager
Oct 20	ITIL Foundation (2011)
Nov 18	AWS Associate Solution Architect
Oct 14	PMI Project Management Professional

Professional Practice (Selected Projects) [top]

Cloud/Platform [top]

Project	Volume (€)	Duration	Client	Role	Description
Fraud Detection	5M	Mar 22 - Today	Public Finance	Project Manager	Leading and consulting in AI project for fraud detection
Cloud Transformation	500k	Sep 21 - Dec 21	TelCo	Architect	Development of cloud and analytics business cases for multiple subsidiaries in the group
Architecture Consulting	500k	Jun 19 - Dec 19	Public Finance	Architect	Information Security Analysis including vulnerability remediation
Crisis Preparedness Information System	1M	Oct 18 - Apr 19	Public Defense	Architect	Public Defense - Architect - Design of data management and data model

AI/ Data Science [top]

Project	Volume (€)	Duration	Client	Role	Description
Semantic Interoperability for Legal Concepts using Generative AI	500k	Jul 23 - Dec 23	Public Finance	GenAI Lead	Leading the development of an end to end approach based on GenAI
Efficient Design of Complex Administrative Procedures with Generative AI	1M	May 23 - Oct 23	Public	GenAI Lead	Leading the GenAI architecture and PoC development
BSI IT Basic Protection	500k	Feb 23 - May 23	Public Defense	Engineering Lead	Leading the AI driven automation of security requirements analysis
Information Retrieval	500k	Dec 21 - Apr 22	Public	Project Manager	Development and comparison of information retrieval architectures based on Elastic Search
AI Strategy	300k	Oct 21 - Feb 22	Automotive	Architect	Idea generation, analysis, and evaluation of AI use cases
Anomaly Detection in Production	500k	Apr 18 - Sep 18	Automotive	Data Scientist	Development of features and algorithms for anomaly detection in laser hardening
Predictive Maintenance in Transportation	1M	Jul 16 - Mar 17	Public Transport	Project Manager, Data Scientist	Feature engineering for AI model. Big Data Test Management

Languages [top]

German (native speaker), **English** (business fluent)

AIRE - AI Driven Requirements Engineering [top]

The business world is constantly evolving, which means that organisations using and creating software must adapt to stay competitive. However, keeping up with the rapidly changing landscape can be difficult. That's where artificial intelligence (AI) comes in. This framework shows how AI can enhance the requirements engineering process, giving businesses a competitive edge. AI driven requirements engineering can help organizations make better decisions and implement policies more effectively by providing them with more accurate, comprehensive, and timely information. Several examples show a successful application of AI in requirements engineering.
